

Mee Jee Kim

Chemistry student

I am a second-year chemistry student currently working on a multimodal model for precise growth diagnosis of smart farm tomatoes using sensor and image data. I am actively learning programming and data analysis while applying them to real-world problems.

SKILLS

Programming Python	Design Tools Figma, Miricanvas	Document writing	Teamwork
------------------------------	--	-------------------------	-----------------

EDUCATION

Chemistry

-  Sungkyunkwan University  2025 – 2028 (expected)
- Curriculum Chemistry
 - Current GPA: 4.22

EXPERIENCE

Smart Factory Capstone Design Project

-  Mar – June 2026 (16 weeks)(ongoing)
- Keywords:** *Multimodal Learning, Sensor Data, Image Data, Data Integration*
- Developing a multimodal model integrating sensor and image data for tomato growth diagnosis.
 - Performing data preprocessing and basic analysis using Python.
 - Assisting in model design and data integration.
 - Collaborating with team members on project development.

Course Project — Problem Solving and Computational Thinking

-  Mar – June 2025 (16 weeks)
- Keywords:** *Personalized Medication Dosage Calculator, Algorithm Design, Rule-based Modeling, Healthcare Data Processing*
- Developed a rule-based algorithm for personalized medication dosage calculation using patient data.
 - Designed a risk scoring system with weighted factors and normalized output.
 - Implemented a text-based interface and structured the program using modular functions.

OTHER ACTIVITIES AND PROJECTS

Rotaract Club — PR Team Leader <i>from 2025 – Managed promotional content and led team activities (ongoing)</i>	Korea University Student Mentor Association(31st Member) <i>from 2026 – Participating in mentoring and student support activities(ongoing)</i>	Etoos Supporters <i>from 2026 – Engaged in marketing and content creation activities</i>
